Nourishing rub-in preparation for hygienic hand disinfection and surgical hand and forearm disinfection

Characteristics

- fully virucidal effect
- high quality alcohols prevent the dehydration of the skin
- sustains the natural pH value of the skin
- pleasant pine scent
- euro bottles compatible with all standard wall dispensers
- VAH listed

Recommendations for use

- perform steps 1-6 for 5 seconds each
- apply hand disinfectant on dry hands only
- remove jewellery or watches before disinfecting
- keep fingernail length short to prevent perforating the gloves
- artificial nails and nail polish are not recommended
- using an elbow operated or automatic sensor wall dispenser prevents cross contamination
